**Øyvind Gerrard Skaar**

---

Hi, I'm Øyvind. I'm an independent consultant, developer and architect, based in Oslo, Norway.

#### Contact information

I've taken contract work since 2014 and worked on 10 projects for 7 different clients. Some of these have been multi-year, full time contracts while others have been advisory roles or short-time projects.

#### Projects & Clients

These days I only work on projects using Go and/or Google Cloud Platform. This is *not* because I believe they are strictly superior, or even that the choice of technology is very important for most projects.

#### More about what I do and how

I also write about backend architecture, Go, Google Cloud Platform and related topics:

- [How to use Google Cloud Storage with Golang \(with a Google Cloud rant thrown in\)](#) (October 2016)
- [Learn from my Go mistakes, Part 1: Closing over loop variables](#) (May 2016)
- [A few places you can find Golang remote jobs](#) (April 2016)
- [How-to build Docker from source](#) (July 2015)
- [A few \(more than one and less than ten\) reasons Redis is awesome!](#) (December 2014)
